

## **Rules for Team Sports**

### **AGE GROUPS AND EVENTS**

Only one player older than the registered age group will be authorized per team. If there are two or more, the team will automatically be placed in the higher age group.

A participant can register in only one event in addition to track and field. In this way, scheduling conflicts are avoided.

*\*Ideally, we would like to have three teams per age group per event as this creates better competition. However, we have no control over registrations. In the event that there are only two teams registered in a category, the two parties will be consulted to find the best solution. We do not want to prevent the students from participating.*

*\*Once your team is registered in an age group, you cannot change it. We are aware that the team's line up might change during the months preceding the Games, but you must ensure that any changes or additions that are made do not affect the age group in which the team is registered.*

### **Track and Field Rules**

If the registered student cannot attend the events, you can replace him or her with another student of the same gender and in the same age group. No addition will be accepted; only a replacement.

The deadline for all changes is Friday April 27, 2012 at 4 p.m. No changes concerning athletes will be accepted after this date.

### **It is important to respect the following two dates:**

**Registration deadline: Friday March 30, 2012 at 4 p.m.**

The following forms must be submitted to the FNEC:

- School or Community Registration Form
- Person in Charge - Chaperon Registration Form
- Parental Consent Form and Medical Record
- Team Registration Form (Sporting Events)
- Track and Field Registration Form

**Deadline for changes: Friday April 27, 2012 at 4 p.m.**

- This is the last chance to make changes related to the participants.
- We estimate that one month before the Inter-school Games, you should be able to know which students will actually be able to participate in this sporting event.
- No change will be accepted past this date, or upon arrival at the site of the Inter-school Games.

*\*We ask you to respect the deadlines and not bring changes to the site of the Inter-school Games. In track and field for example, this will save us precious time. Registering each athlete in the various events requires a lot of organization considering the growing number of athletes and the tight schedule of track and field events.*
